

Postgraduate studies programs:

1) Research master and Ph.D. Programs:

Aswan university, based on the proposal of faculty of agriculture and natural resources, grants scientific degrees (Research master's and Ph.D.) in 20 specialized programs granted by the scientific departments.

Number	Research master and Ph.D. programs	Department
1	Lands and natural and agricultural resources.	Lands and natural and agricultural resources.
2	Food sciences and technology	Food sciences and technology
3	Dairy sciences and technology	Dairy sciences and technology
4	Agricultural economy	Agricultural economics and extension.
5	Agricultural extension	
6	Rural sociology	
7	Animal production	Animal and poultry production
8	Husbandry production	
9	Pomology	Horticulture
10	Vegetables crops	
11	Ornamental plants and landscaping	
12	Ornamental and medicinal plants.	
13	Agronomy	Agronomy
14	Plant pathology	Plant pathology
15	Agriculture microbiology	Agriculture microbiology
16	Genetics	Genetics

17	Agricultural biochemistry	Agricultural biochemistry
18	Economic pesticides	Plant pathology
19	Insecticides	
20	Agricultural engineering and vital systems	Agricultural engineering and vital systems

2) Professional master's programs:

Aswan University, based on the proposal of faculty of agriculture and natural resources, grants professional master's degree in 13 specialized programs granted by the scientific departments.

Number	professional master's programs	Department
1	Desert lands reclamation and cultivation	Lands and natural and agricultural resources.
2	Food technology	Food sciences and technology
3	Therapeutic feeding	
4	Dairy technology	Dairy sciences and technology
5	Economic feasibility study of agricultural projects	Agricultural economics and extension.
6	Agricultural extension.	
7	Animal husbandry and poultry farming in tropical and semi tropical areas.	Animal and poultry production
8	Horticulture crops for export technology	Horticulture
9	Crop production	Agronomy
10	Biotechnology	Agriculture microbiology. Genetics Agricultural biochemistry

11	Beekeeping and honey production	Plant protection
12	Palm pest control and clean dates production	
13	Modern techniques of agricultural engineering	agricultural engineering and vital systems
